DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27, drawn to a field emission array, classified in class 313, subclass 309.
 - II. Claims 28-37, drawn to a method of detecting electromagnetic radiation and storing data representative of the electromagnetic radiation, classified in class 250, subclass 208.1.
 - III. Claims 38-47, drawn to a video camera, classified in class 348, subclass 207.99.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I is an apparatus can be processed by different method, which does not need measuring a potential across a the capacitor as defined by method claimed in Group II or includes the structure claimed in Group III. The reasoning is the same for other two groups. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2612

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
